

## **Position of the Florida Municipal Electric Association on the Proposed Sale of the Vero Beach Electric Utility**

FMEA's position on the proposed sale of the Vero Beach Electric Utility is straightforward: If the City is going to make this important decision, it should do so with all the information on the table, all facts known, all impacts understood. All the facts of the situation are currently not known. This is a complex issue and we must all wait until the facts are divulged before everyone understands the impacts of the proposed sale on the Vero Beach community. This includes understanding FPL's impending offer and resolving all contractual issues to understand all financial and liability issues. We urge everyone to seek the facts before forming an opinion. Furthermore, we discourage personal attacks, false accusations and baseless assumptions.

If anyone has a question or comment about this position, FMEA invites you to engage in conversation to discuss facts. Please contact Barry Moline at:
